As you may see from the appended list of artifacts found at F-v-229, both at the surface and in minor testings, there are hints of occupations of three other cultural groups which we never found components of. Two of the lanceolate projectile points typologically would appear to belong to an Archaic manifestation which is, as yet, undefined for this area. Black Sand sherds, and long side-notched points seem to indicate that possibly groups belonging to the Black Sand Focus once lived at the Weaver Site. If so, we never found the exact spots of those occupations. The Liverpool Ware sherds also suggest that there might have been a Morton Focus occupation at the Weaver Site.

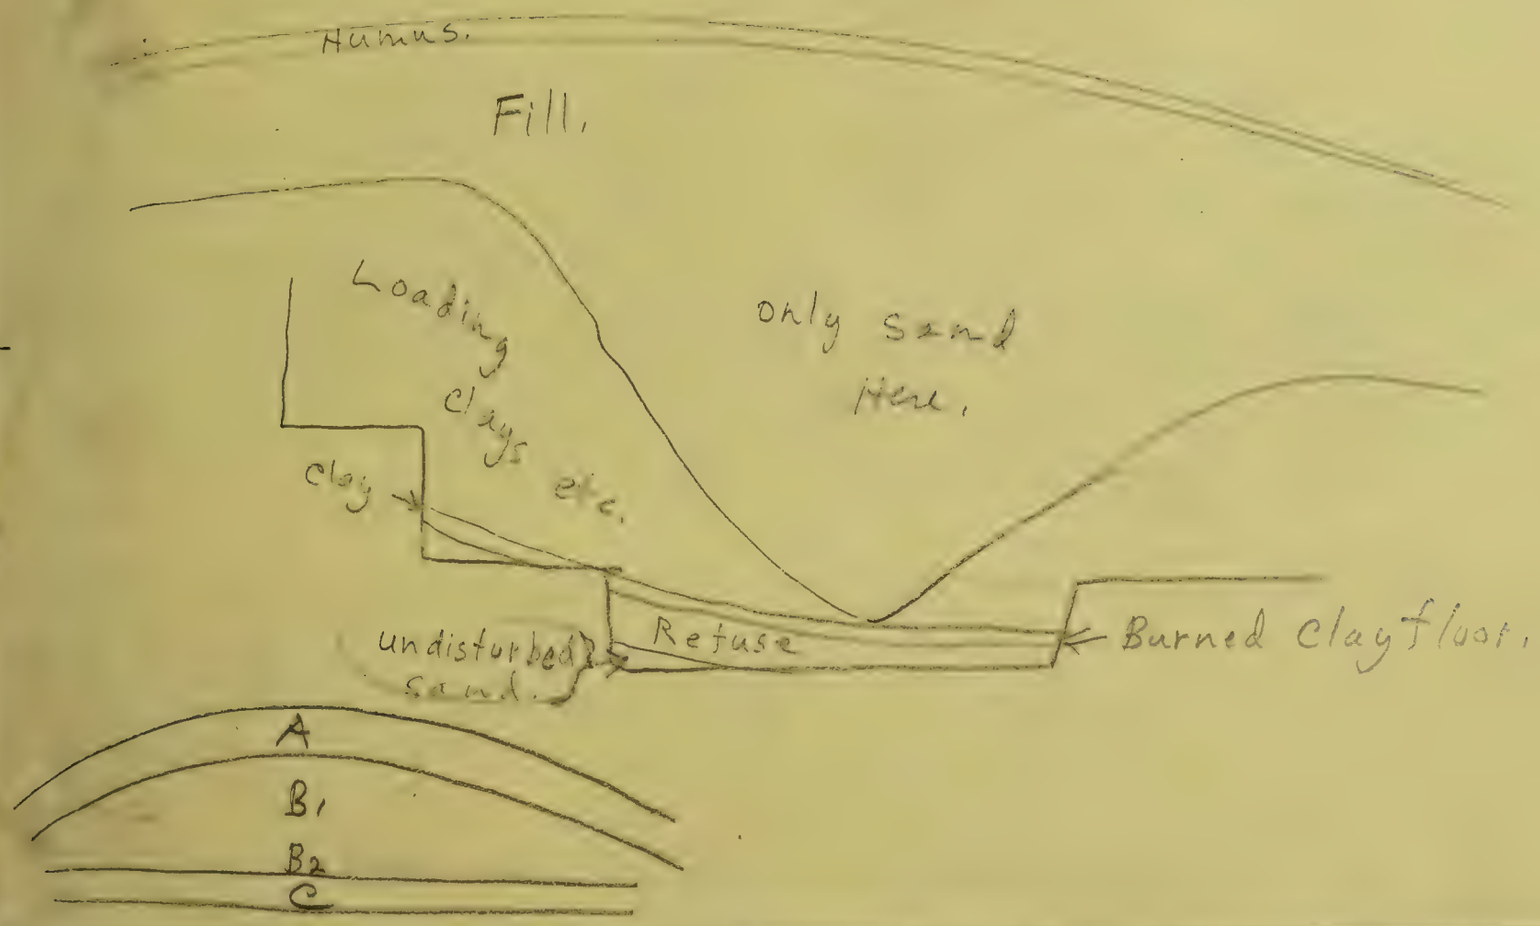
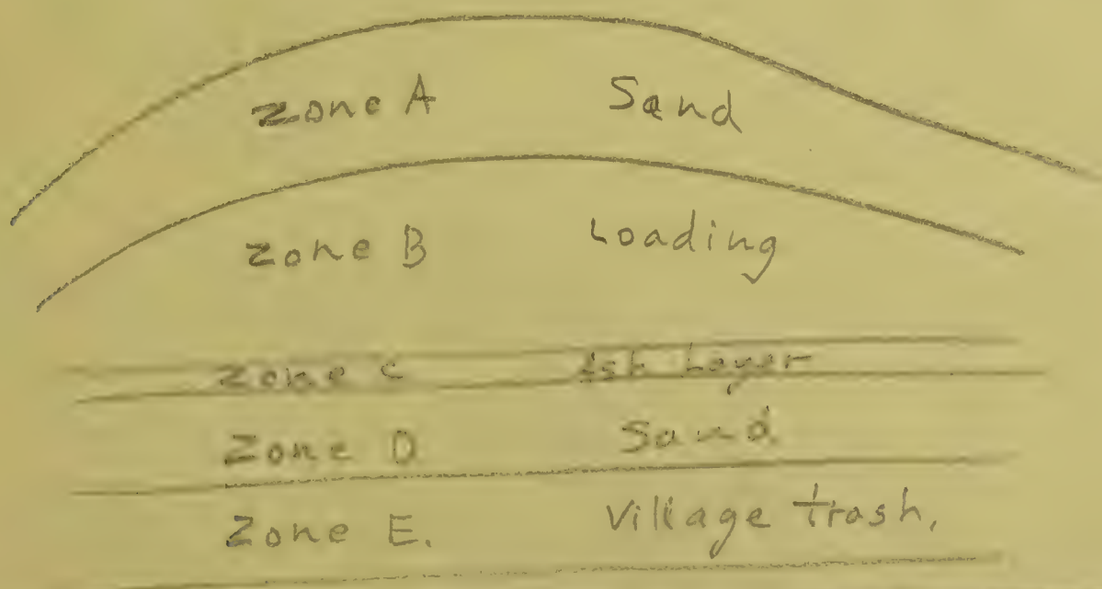
Mound #9

as a reminder to help you interpret what I have written.



Mound #6



I have suggested in my letter that perhaps the loading zone of the two mounds about Jonesboro, also I feel (on not too sure evidence) the village trash under both mounds is not the earliest of the site.

J Emery Nov. 22 - 1947
